eLearning

First steps in innovation and entrepreneurship | The Open University

8 hrs  1,141    43

About this learning activity

This is an intermediate, free course offered by [OpenLearn](#). This course provides you with a short introduction to innovation and entrepreneurship, clarifying some key themes and terminology, and helping you to examine your own views about these important subjects.

Duration: 8 hours

Registering: You must create an account to sign in.

Completion: Upon completion, you will earn a Statement of Participation.

Language: This course is available only in English.

Download: You can take the course online or there are options to download the course for use offline or for other devices.

Learning outcomes you can expect:

- Examine personal pre-existing ideas and assumptions about innovation and entrepreneurship, and see how they compare to those of other people.
- Identify core innovation and entrepreneurship terms and categories, apply these categorisations to practical examples and recognise where boundaries between these categories are blurred.
- Recognise the main connections between innovation and entrepreneurship and start to isolate a distinctively 'entrepreneurial' role in the innovation process.

After you complete this activity, return to this page to select **Mark complete** for completion credit.
