Launch of 2nd Year of E CLUBS

Date - DEC 15 2005

NDPL creates Ambassadors for Energy Conservation LAUNCHES NDPL ENERGY CLUB - PHASE 2

New Delhi, Dec 01, 2005: These days school children in North Delhi are learning an important lesson - **Energy Conservation**. To make children ambassadors who spread the message of energy conservation, **NDPL** had launched its initiative called **NDPL Energy Club**, a year ago. Encouraged by the success of the pilot project which involved 3000 children covering 5 schools, the company today extended this drive to 20 more schools in its area. The event to kick start the 2nd year of NDPL Energy Club was held today in the presence of **Shri Arvinder Singh Lovely**, Hon'ble Minister of Education, GoNCTD and **Shri Haroon Yusuf**, Hon'ble Minister for Power & Transport, GoNCTD. 2005.

The **NDPL Energy Club** was started in 2004 with the objective of creating active energy conservation ambassadors who help spread the message among other

students and also in the community they live in. Having covered more than 3000 students during the first year, the **NDPL Energy Club** will now widen its scope with inclusion of subjects like water harvesting, environment and health sciences and other related issues. The company has partnered with **REACHA**, a voluntary organization for this project.

The **NDPL Energy Club** will now cover a total of 25 schools represented by 10 Government schools. The company hopes to cover more than 12000 children this year under this project. The initiative has also drawn praise from the **Ministry of Environment**, Delhi Government.

As part of the project, **NDPL** organises a series of workshops on energy conservation in schools. This is followed by interactive sessions and competitions where students from all participating schools demonstrate their understanding of the issues through debates, quiz competition, poster and model making competition and other such activities. Once the students gather sufficient knowledge on the subject, they undertake a project to spread awareness amongst their family members, neighbours and other students about benefits of energy conservation.

About the company

NDPL is promoted jointly by Tata Power and Government of NCT of Delhi. The company became operational on **1st July 2002** and has initiated efforts to improve the power distribution in **North and North West Area of Delhi**. The initiatives include **scientifically detecting the weak spots in the grid stations, providing reliability to the network, and their rectification; introduction of new meters** to minimize the human error and a number of consumer priority initiatives like **providing drop box facility for bill payment, increasing bill payment timings, organizing camps for meter regularization and settle pending cases**, etc.
